

BeSang Inc.

3D Enabling Technology

Dr. Yohwan Koh Joins BeSang Technology Advisory Board

Dr. Yohwan Koh, the former senior vice president and head of NAND flash business for SK Hynix, has joined BeSang Inc. as an advisor. He has 25 years of professional management, manufacturing and technology development experience in highly advanced NAND and DRAM semiconductor memories.

Dr. Koh will work closely with Dr. Sang-Yun Lee, founder and CEO of BeSang Inc, in order to introduce BeSang's proprietary 3D super-NAND flash memory products to the market. BeSang expects that 3D super-NAND will provide the highest density NAND at the lowest cost in the industry.

About BeSang Inc.

BeSang is a pioneer in the design, development, and delivery of unsurpassed three-dimensional (3D) IC solutions, providing unmatched process and design technologies for TRUE 3D™ IC as well as technology licenses to customers. BeSang provides high-value intellectual properties related to its proprietary TRUE 3D™ ICs. The fabless semiconductor company is headquartered in Beaverton, Oregon, USA. Additional information is available at www.besang.com.
